- Genetic programme and results
- Challenges in hatchery community
- Broodstock health management, disease management
- Disease resilience measures

SPEAKERS

STEPHEN WHITE

Director, SPD

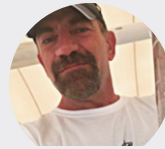

has called for concrete action to reduce chances for disease and slow growth both in hatcheries and farms, by making use of Genotypic And Phenotypic Selection, make hatcheries to produce more eggs and more nauplii and cut the cost of transportation mortality.

LORENZO JUAREZ

CEO, SPD, Seminar Director

(38 years in the field with Vannamei broodstock and hatcheries) will highlight challenges faced by hatchery communities, including in receiving and acclimatizing broodstock in general and lead his team to present on how to prevent EHP, and question and answer sessions on maturation protocol.

EDUARDO FIGUERAS

Chief Production Officer, SPD

with 26 years international experience selects only the largest and best broodstock from our raceways to sell to our customers in India. He will speak about our genetic programme.

ADRIANA ARTILES-VALOR

Prometheus Genetics

our sister company will speak on elevating broodstock for health management, disease management and genetics management in vannamei farming unattainable via existing technologies.

ANNIE WANGLIN

SPD, China will present results of broodstock used in china
