

Press Map Neogen Europe – Aqua 2018

Neogen's company profile

Neogen develops and markets products dedicated to support both the food and animal safety industries. With locations worldwide, including the US, UK, Brasil, India, Mexico, China, and Australia, Neogen now employes over 1600 staff.

Neogen develops and supplies on-site diagnostic test kits and laboratory services to ensure food safety throughout the entire supply chain, from farm to fork. Neogen's Animal Safety Division is a leader in the development of animal genomics for the improvement of livestock and crops along with the manufacture and distribution of a variety of animal healthcare products. In addition, our forensic toxicology and life science research kits are being used by many leading organisations across the globe.

Neogen's Aquaculture Solutions

Neogen markets and develops a comprehensive range of simple, on-site, rapid, easy-to-use seafood and shellfish tests. Our tests allow companies to test for harmful toxins and residues throughout the supply chain. Neogen is the only commercial company to offer both on-site testing for marine biotoxins and external laboratory testing to detect ASP, DSP and PSP toxins. All tests are compatible with FDA and EU commission permitted levels and results can be obtained in as little as five minutes. We also offer a range of testing solutions for the detection of histamine in three easy to use formats to suit different testing requirements, each with a simple water extraction. In addition, we can offer a rapid semi-quantitative test for detecting sulfites in shrimp. Neogen's offering also includes a diverse range of solutions for hygiene monitoring, pathogen detection and other microbiology challenges.

Our genomics laboratories offer genomic services worldwide that deliver innovative DNA testing for the discovery and commercial application of genomic advances. Neogen offers whole aquaculture genome, genotyping or copy number variation analysis services based on Illumina's Infinium chemistry or Affymetrix Axiom technology. We offer both readily available fixed content arrays or our highly experienced custom array design team can build a custom content array for your focused research project or breeding programme.

Neogen's biosecurity solutions for aquaculture offer farmers critical protection for their fish stocks, helping them to maximize profits by reducing disease related mortalities. Our hygiene products for aquaculture are key to reducing pathogenic loads in aquatic production environments in order to achieve high productivity whilst maintaining conditions that cultured species can thrive in. Our disinfectants for aquaculture are used to protect against bacteria, parasites, protozoa and viruses. In addition, our Life Science Solutions comprise over 60 test kits which provide sensitive, quick and dependable ELISA's for multiple research applications and stock monitoring including histamine and cortisol used for monitoring aquaculture health & wellbeing.
