Short Curriculum Vitae of WANG Qingyin

WANG Qingyin, President of China Society of Fisheries, senior researcher and former Director General of Yellow Sea Fisheries Research Institute, Chinese Academy of Fishery Sciences. He has been working on genetics and breeding of maricultural organisms and maricultural technologies since the early 1980s', especially on the selective breeding and genetic improvement of new varieties with traits such as faster growth rate and disease resistance in farming shrimps. He has published over 260 peer-reviewed articles and 14 books as chief editor on breeding and mariculture relevant themes. His research achievement "The breeding of 'Huanghai No. 1' new variety of shrimp *Fenneropenaeus chinensis* and healthy farming technology" was awarded as the second class prize of National Science & Technology Invention Award of China in 2007, and over 10 achievements were awarded as province/ministry level science and technology progress award in China.
