Aker BioMarine is a leading supplier of high quality, krill-derived products to maritime nutrition. We supply bioactive marine ingredients through a 100% traceable and sustainable supply chain. In aqua diets, QRILL™ functions as a feeding stimulant leading to increased feed uptake and enhanced growth. It enables similar or improved performance at lower cost through replacement of other ingredients. QRILL™ is also proven to increase stress tolerance and boost survival rates.

Specialized in the detection and the counting for aquaculture, we design and manufacture mainly fish counters with more than 30 years' experience.

Our new series of fish counters: FC2 (2 channels) - FC4 (4 channels) - FC8 (8 channels) is designed with new technologies.

Light - Robust - Accurate - Intelligent - Rapid Maintenance, it replace advantageously our old fish counters C16.

New Product/Service:

New fry counter FC12 type.

12 counting channels, fry size : 1 gr to 20 gr, counting capacity : 100 000 fry per hour

This counter can be fit on all types of fish graders or directly to the fish pump outlet.

The global aquaculture industry plays an increasingly pivotal role in food security efforts as the world's population continues to grow. Deep Trekker has been providing fish farmers with the capabilities to investigate and monitor underwater using the DTG3 ROV and DTPod surveillance camera. These robotic solutions ensure effective cleaning and monitoring for wear and tear that could cause fish escapes, routine net and pen inspections, and consistent monitoring of stock health and feeding.
